January 9, 2007

You currently have an administrative order from the Washington State Department of Ecology (Ecology) authorizing you to operate a chitosan enhanced sand filtration system. This order allows you to use StormKlear LiquiFloc™ in the filter system for treatment of construction stormwater from your site.

Ecology has recently met with the manufacturers of StormKlear LiquiFloc™ and a similar chitosan acetate product, ChitoVan™. Based on an initial assessment of these two products, Ecology has decided to allow the use of both of these products pending our completion of additional evaluations. Until you receive additional notification from Ecology, you are authorized to use either StormKlear LiquiFloc™ or ChitoVan™ in your chitosan enhanced sand filtration system.

Regardless of which of these two products you use, you must comply with all the requirements of the conditional use level designation given to Natural Site Solutions for chitosan enhanced sand filtration using StormKlear LiquiFloc™.

If you have any questions regarding this matter, please do not hesitate to contact Mieke Hoppin by telephone at 360-407-6435 or by email at mhop461@ecy.wa.gov

Sincerely,

A handwritten signature in cursive script that reads "Nancy L. Winters".
